

App. No. 10/763.132
Attorney Docket 3088.2.1 NP

Amendments to the Claims

1. (Currently Amended) A medication access control device, comprising:
 - a housing having a base and a cover;
 - a medication cartridge, having a rotational member and plurality of
dispensing holes;
 - a manual actuator including a threaded head for locking the actuator in an
expel position;
 - a locking lug configured to prevent the[[a]] rotational member from
rotating; and
 - a rewind protection member configured to prevent the rotational
member from rotating in reverse.
2. (Original) The medication access control device of claim 1, wherein the
dispensing holes are housed in a penetrable seal that is located on both a top and bottom
side of the dispensing holes.
3. (Original) The medication access control device of claim 1, wherein the actuator
acts as a lock when medication has been expelled.
4. (Canceled)
5. (Original) The medication access control device of claim 1, wherein the cover
includes a window for viewing the medication cartridge and a window for displaying the
device status.

Attorney Docket 3088.2.1 NP

6. (Original) The medication access control device of claim 1, wherein the housing is made of a rigid material.
7. (Original) The medication access control device of claim 1, further comprising a handle that passes through the cover of the housing.
8. (Original) The medication access control device of claim 1, wherein the base and a cover are sealed together to prevent opening thereof.
9. (Original) The medication access control device of claim 1, wherein said housing is coupled together with a hinge and locked with a locking device.
10. (Original) The medication access control device of claim 1, wherein said medication cartridge can be removed and replaced.
11. (Original) The medication access control device of claim 1, wherein said rotational member can be removed and replaced by one other than the user to correspond to the dosage requirements of the medication cartridge.
12. (Original) A medication dispensing device, comprising:
 - a battery;
 - a countdown timer, electrically coupled to the battery;
 - a solenoid, electrically coupled to the timer and the battery;
 - a locking lug connected to said solenoid;
 - a lug lock for holding the locking lug in a retracted position;
 - a spring that advances the lug lock into a locking lug hold;
 - a trigger for releasing the lug lock from the locking lug; and

a rewind protection member configured to prevent a rotational member from rotating in reverse.

13. (Original) The medication access control device of claim 12, wherein said solenoid retracts said locking lug from said rotational member.

14. (Original) The medication access control device of claim 12, wherein a tooth from the rotational member actuates the trigger to release the lug lock from the locking lug.

15. (Currently Amended) The medication access control device of claim 12, wherein the medication access control device can [[be]] have the timer reprogrammed.

16. (Canceled)

17. (Canceled)

18. (Canceled)
